

Assignment: Appointment Booking System with Agentic AIs

Problem Statement:

Build a simple Appointment Booking System where agentic AIs collaborate to manage scheduling requests.

Requirements

- Accept a natural language input like *“Book an appointment tomorrow at 3 PM”*.
- Use **2 agents** working together:
 - **Agent 1** – Checks availability and schedules the appointment.
 - Agent 2 – Parses user input and returns a confirmation message.
- Return a confirmation message to the user.

Deliverables

- A minimal working prototype.

Bonus Points

- Add any small improvement or feature of your choice.
