

## **Assignment: PDF Chatbot with RAG**

### **Problem Statement:**

Build a minimal chatbot that allows a user to upload a PDF and then ask simple natural language questions about its contents. The chatbot should use Retrieval-Augmented Generation (RAG) to fetch relevant sections from the PDF and return an answer.

### **Requirements**

- Allow user to upload a single PDF.
- Implement a basic chatbot that:
  - Takes a user query.
  - Returns answer for that query.

### **Deliverables**

- A minimal working prototype
